

In an Excel worksheet, Pick from the following Tabs; Home, Insert, Page Layout, Formula and Data and under each, identify the ribbons found and indicate their roles.

ASSIGNMENT ONE

GEOFFREY DZOTSI

HOME TAB	
Ribbon	Role
<i>Paste</i>	Paste a content that was previously copied
<i>Cut</i>	Remove a selection to be pasted somewhere else
<i>Copy</i>	Make a selection and paste somewhere else without necessarily removing it
<i>Format Painter</i>	Imitate the look of a particular selection
<i>Bold</i>	Makes a text bold
<i>Italic</i>	Italicize a selected text
<i>Underline</i>	Underline a selected text
<i>Font</i>	The style of your text font
<i>Font Size</i>	Determines the size of text
<i>Bottom Border</i>	Apply borders to a selected text
<i>Increase Font Size</i>	Make your text a bit bigger
<i>Decrease Font Size</i>	Make your text a bit smaller
<i>Fill Color</i>	Color the background of cells
<i>Font Color</i>	Change the color of text
<i>Top Align</i>	Align text to the top
<i>Align Left</i>	Align your text content to the left
<i>Decrease Indent</i>	Move your content closer to the cell border
<i>Middle Align</i>	Align text so that it is centered between top and bottom of the cell
<i>Centre</i>	Centre your text
<i>Increase Indent</i>	Move your content farther away from the cell border
<i>Bottom Align</i>	Align text to the bottom
<i>Align Right</i>	Align your content to the right
<i>Orientation</i>	Rotate your text diagonally or vertically
<i>Wrap Text</i>	Wrap extra-long text into multiple lines in one cell
<i>Merge and Centre</i>	Combine and Centre the content of the selected cells in a new larger cell
<i>Number Format</i>	Helps you to choose the format of your cell such as Percentage, Currency, Time or Date
<i>Accounting Number Format</i>	Format such as Dollar, Euro and other currencies
<i>Increase Decimal</i>	Show more decimal places for a precise value
<i>Percent Style</i>	Format as a Percentage
<i>Decrease Decimal</i>	Show fewer decimal places
<i>Comma Style</i>	Format with a thousand separator
<i>Conditional Formatting</i>	Easily spots trends and patterns in a particular data
<i>Format as Table</i>	Quickly convert a range of cells to a table with its own style
<i>Cell Style</i>	Makes your data standout by giving it a unique color
<i>Insert</i>	Add a new row, column or sheet to your workbook
<i>Delete</i>	Delete rows, columns, cells or sheets from a workbook
<i>Format</i>	Change the row height or column width, organize sheets, or protect or hide cells
<i>Sum</i>	Automatically add it up
<i>Fill</i>	Continue a series or pattern into neighboring cells in any direction
<i>Clear</i>	Delete everything in the cell or remove just the formatting contents, comments or hyperlinks

<i>Sort and Filter</i>	Organize your data so it is easy to analyze
<i>Find and Select</i>	Helps you with options for finding a text in you document

INSERT TAB	
Ribbon	Role
<i>Pivot Table</i>	Easily arrange and summarize complex data in a Pivot Table
<i>Recommended Pivot Table</i>	Recommends a Pivot Table
<i>Table</i>	Create a table to organize and analyze related data
<i>Illustrations</i>	Illustrations
<i>Store</i>	Find add-ins in the office store
<i>Insert an Add-in</i>	Insert an add-in and use the web to enhance your work
<i>Visio Diagrams</i>	Quickly and easily visualize your data into polished Visio diagrams within Excel
<i>Bing Maps App</i>	Makes it easy to plot locations and visualize your data through Bing Maps in Excel.
<i>Transform Tab</i>	Transform cold data into cool picture.
<i>Recommended Charts</i>	Recommends good charts to showcase your data
<i>Insert Column/Bar Chart</i>	Use this Chart type to visually compare values across a few categories
<i>Insert line or Area chart</i>	Use this Chart to shoe trends overtime (years, months and days) or categories
<i>Insert Pie/Doughnut Chart</i>	Use this Chart to show proportions of a whole
<i>Insert Hierarchy Chart</i>	Use this Chart type to compare parts to a whole or when several columns of categories form a hierarchy
<i>Insert Statistic Chart</i>	Shows statistical analysis of your data
<i>Insert Scatter (X,Y) or Bubble Chart</i>	Shows the relationship between sets of values
<i>Insert Waterfall/Stock Chart</i>	Shows cumulative effect of a series of positive and negative values. Shows the trends of stock performance over time.
<i>Insert Combo Chart</i>	Highlights different types of information
<i>Insert Surface or Radar Chart</i>	Shows trends in values across two dimensions in a continuous curve. Shows values relative to a center point.
<i>Pivot Chart</i>	Use Pivot Chart to geographically summarize data and explore complicated data.
<i>3D Map</i>	See your geographic data on a 3D map visualized over time.
<i>Line Sparkline</i>	Mini charts placed in single cells, each representing a row of data in your selection.
<i>Column Sparkline</i>	Mini charts placed in single cells, each representing a column of data in your selection.
<i>Slicer</i>	Help to filter data visually.
<i>Timeline</i>	Filter dates interactively.
<i>Hyperlink</i>	Create a link in your document for quick access to webpages or files.
<i>Text</i>	Insert text/signature on document.
<i>Symbols</i>	Insert mathematical equations or symbols
PAGE LAYOUT TAB	
Ribbon	Role
<i>Theme</i>	Help you to personal your theme
<i>Theme colors</i>	Help you to personal the color of your theme
<i>Theme Fonts</i>	Help you to personal the font of your theme
<i>Theme Effects</i>	Change the general look of objects in your document

<i>Adjust Margin</i>	Set margin sizes for the entire document or the current selection
<i>Orientation</i>	Give your page a portrait or landscape layout
<i>Size</i>	Paper size for your document
<i>Print Area</i>	Select an area on the sheet you would like to print
<i>Break</i>	Add a break where you want the next page to begin in the printed copy
<i>Background</i>	Choose a picture for your background
<i>Print Titles</i>	Choose rows and columns you would like to repeat on each printed page
<i>Width</i>	Shrink the width of your print out to fit a certain number of pages.
<i>Height</i>	Shrink the height of your print out to fit a certain number of pages.
<i>Scale</i>	Stretch or shrink your printout to a percentage of its actual size
<i>Gridlines</i>	Show gridline or Heading with or without print view
<i>Bring Forward</i>	Bring the selected object forward one level or bring it in front of all the other object.
<i>Send Backward</i>	Bring the selected object backward one level or bring it behind of all the other object.
<i>Selection Pane</i>	Makes it easier to select objects, change their order, or change their visibility.
<i>Align</i>	Change the placement of your selected objects on the page
<i>Group Objects</i>	Join object together to move and format them as if they were a single object
<i>Rotate</i>	Rotate or flip the selected object.

FORMULAR TAP

Ribbon	Role
<i>Insert Function</i>	Works with the formula in the current cell
<i>Auto Sum</i>	Automatically add it up
<i>Recently Used</i>	Quickly choose from function you recently used
<i>Financial</i>	Add a financial function to your sheet
<i>Logical</i>	Add a logical function to your worksheet
<i>Text</i>	Add a text function to your worksheet
<i>Date & Time</i>	Add that time function
<i>Lookup & References</i>	Add a lookup or reference function to your worksheet
<i>Math & Trigonometry</i>	Add a math or trigonometry function to your worksheet
<i>More Function</i>	Browse more function
<i>Name Manager</i>	Create, edit, delete and find all the names used in the workbook
<i>Define Name</i>	Define and apply name
<i>Use in Formula</i>	Choose a name used in this workbook and insert it into the current formula
<i>Create from Selection</i>	Automatically generate names from the selected cells
<i>Trace Precedents</i>	Show arrows that indicate which cells affect the value of the currently selected cell
<i>Trace Dependents</i>	Show arrows that indicate which cells affect the value of the currently selected cell
<i>Remove All arrows</i>	Remove the arrows drawn by Trace Precedents or Trace Dependents
<i>Show Formulas</i>	Display formulas in each cell instead of the resulting value
<i>Error Checking</i>	Check for common errors that occur when using formulas
<i>Evaluate Formula</i>	Debug a complex formula, evaluating each part of the formula individually
<i>Watch Window</i>	Add cells to the Watch Window list to keep an eye on their values as you update other parts of the sheet

<i>Calculation Options</i>	Choose to calculate formulas automatically or manually
<i>Calculate Now</i>	Calculate the entire workbook now
<i>Calculate Sheet</i>	Calculate the active sheet now
DATA TAB	
Ribbon	Role
<i>Get External data</i>	Source data from other locations
<i>New Query</i>	Easily discover, connect and combine data from multiple sources, then shape and refine it to meet your needs.
<i>Show Query</i>	View the list of queries in this workbook
<i>From Table</i>	Create a new query linked to the selected Excel Table
<i>Recent Sources</i>	Manage and connect to recent sources
<i>Refresh All</i>	Get the latest data by refreshing all sources in the workbook
<i>Connections</i>	Display all data connections for the workbook
<i>Properties</i>	Specifies how data connection to certain sources will update what content from the source will be displayed etc.
<i>Edit Links</i>	View all of the other file this spreadsheet is linked to so that you can update or remove the links.
<i>Sort A to Z</i>	Sort from the lowest to the highest
<i>Sort Z to A</i>	Sort from the highest to the lowest
<i>Sort</i>	Find values quickly by sorting your data
<i>Filter</i>	Turn on filtering for the selected cells
<i>Clear</i>	Clear the filter and sort state for the current range of data
<i>Reapply</i>	Reapply and filter and sort on the current range so that changes made are included
<i>Advanced</i>	Options for filtering using complex criteria
<i>Text-to columns</i>	Split a single column of text into multiple columns
<i>Flash Fill</i>	Automatically fill in values
<i>Remove Duplicates</i>	Delete duplicate rows from a sheet
<i>Data Validation</i>	Pick from a list of rules to limit the type of data that can be entered in a cell
<i>Consolidate</i>	Summarize data from separate ranges, consolidating the results in a single output range
<i>Relationship</i>	Create or edit relationships between tables to show related data from different tables on the same report
<i>What-If Analysis</i>	Try out various values for the formulas in your sheet using scenario manager, Goal Seek and Data Tables
<i>Forecast Sheet</i>	Create a new worksheet to predict data trends
<i>Group</i>	Group rows or columns or automatically create an outline
<i>Ungroup</i>	Ungroup a range of cells that were previously grouped
<i>Subtotal</i>	Quickly calculate rows of related data by inserting subtotals and tables
<i>Show Details</i>	Expand a collapsed group of cells
<i>Hide Details</i>	Collapse a group of cells
